THE FATAL KEROSENE CAN AGAIN

Mrs. John Baker's Horrible Fate-The Result of An Attempt to Hurry Up a Slow Burning Fire with Carbon Gil-An Illustration of the Banger of Being in a Harry.

Again the press of this city is called on o record a horrible and probably fatal case of burning, in which the oil can takes a prominent part. The victim is Mys. high in the community. Mrs. Snyder died the wife of a well-to-do teamster in the city, the numerous fatal accidents that have resulted from using an oil can to hurry up a fire in a cook stove in this city and elsewhere, that their use would be abandoned, but judging from their continued reckless use, the accidents have had no effect.

use, the accidents have had no effect.

Yesterday morning's affair was an awful and sickening one. Mrs. Baker was preparing breakfast, and in order to make the fire burn fast poured in the stove part of the contents of a can of carbon oil. Hardly had the stream touched the stove until the woman was enveloped in flames. Philadelphia and desired a quiet room lately returned farmer's son. They sud-denly became intimate, and until Thursdenly became intimate, and until Thursday night he was constantly in her society. He introduced her to a few young ladies as Mrs. Dickerson, of Philadelphia, and said she was a wife of a friend of his. On Friday morning the servants in the Enyder household were surprised by the non-appearance of Mr. Synder. Bursting open the door, they saw the old man lying at full length upon the floor, bound and gagged. The ropes that bound him were wrapped around his arms and legs with a double twist, while the gag was tightly wedged in his mouth. Cutting the cords and lifting him to his feet, they administered restoratives. When he had sufficiently recovered the old man said: "That young man was screamed and writhed in an agony equal to that of the damned, but afterwards the sight was even worse. The blackened body laid out in a lower room of the neat little house bore but little resemblance to that of a human being, and the stench of the burned flesh, only added to the horror. The lower limbs and lower part of the trunk and the breast were literally roasted, while the head and upper part of the arms were so scorched, blistered and puffed up that one almost sickened as he looked on the quivering mass. The lower part of the arms and the hands, which she had used to beat down the flames as they shot upward, were also terribly burned, some of the literal burned for the lower part of the arms and the hands, which she had used to beat down the flames as they shot upward, were also terribly burned, some of the literal burned for the lower part of the arms and the hands, which she had used to beat down the flames as they shot upward, were also terribly burned, some of the later fall off, and when the literal burned flame had been also been down a piece of paper. Dr. George Garrison was first called and did all in his power, and afterwards Dr. George Baird was summoned. They both gave it as their opinion that the sufferer could not survive, so severely was she burned, although she did not inhale much of the blaze. At midnight she was still alive, but half an hour later word was received at this office that I have been cruelly deceived and rob bed," pointing to a safe which stood in the corner of the room. The servants saw that the safe had been opened and the contents continued the farmer, "the young man and I remained up till about 1 o'clock talking about the Western States. PARKERSBURG.

I'll pay your respects to your son when I get back to Chicago. He wants to hear PARKERSBURG, W. Va. June 24.—The C. rom you.' They went out, locking the W. Anderson arrived here this morning about 2 o'clock with an excursion from Benwood. On their arrival a party of toughs swore that they should not land. The excursionists were not, however, terrified and the boat proceeded to put out a line. The rowdies then said that they would shoot the first man landing, but this they did not do, although numerous shots were exchanged. Those of the excursion did not propose to put up with such a reception and they proceeded to administer a well deserved pounding to their assailants. One received a ducking, being knocked into the river, another had his akull fractured and all got bruised up more or less, while the excursionists came off door after them," This morning a detective saw that the young man was not his son but an old Chicago thief and confidence man, and known among his associates in crime as "Fly Bill," and who went under the aliases of John Peters, Harry Rutledge, consisted of \$4,000 in greencaces and the rest in government bonds. The number of the bonds have been given to the authorities, and a heavy reward will be offered for the arrest of the thieves. A watch was kept at all the railroad stations, but it is thought that the pair are already out of the or less, while the excursionists came off without a scratch. Before the Recorder the excursionists were exonerated, while Messrs. Stafford, McNicholas and Brown

were sent to jail, and the police are looking for the balance, among whom is a young It may be pleasant, (judging from last night's experience) for excursions to come here, but the best people of the city would prefer that they would stay away, at least McCarty and Wm. L. Royall, friends of

pires that the private advices of terrible mortality at Very Cruz from yellow fever were received in Galveston by cable. The best information, which was gleaned from an entirely reliable party in constant telegraphic communition with Vera Cruz is to the effect that the first and worst reports of Saturday are correct. Further communication from the Galvestion quarantine station show that the ship Haytien, recently from Vera Cruz, had no communication with any vessels in that port, besides lighters. This takes away the foundation from reports contradicting the plague. The Haytien's officers, for quarantine reasons, it is said, would be directly interested in suppressing news of such an alarming nature.
